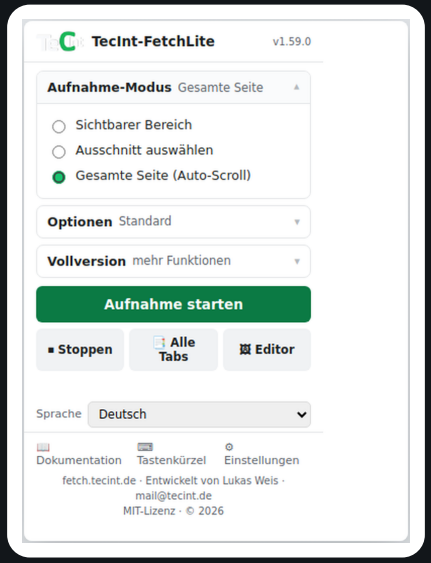
TecInt

TecInt - fetch

Capture web pages that hold up as evidence

One click. Timestamp in the image.
Checksum you can verify.

7 browsers
0 server connections
SHA-256 per file



https://fetch.tecint.de

In three steps

01 Capture

Visible area, a region, or the entire page – long documents in one go instead of separate images.

02 Edit

Arrow, text, marker. Redact other people's data – the originals stay untouched.

03 Prove

SHA-256 per file, capture record, chain of custody. All verifiable.

Three ways to capture

Free. No account.
No server connection.

01

Aufnehmen

Sichtbarer Bereich, Ausschnitt oder die ganze Seite – auch lange Seiten am Stück.

02

Bearbeiten

Pfeil, Text, Marker setzen. Fremde Daten unkenntlich machen – vor dem Export.

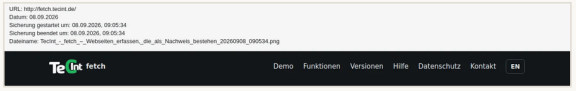
03

Nachweisen

SHA-256, Protokoll und Verlaufskette – nachprüfbar auf jedem Rechner.

The time is in the image

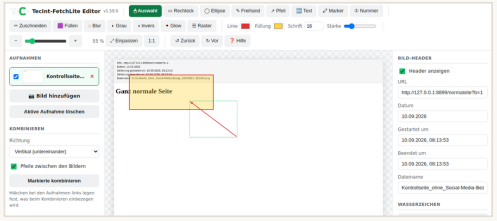
Address, page title, date, start and end – burnt in, not placed alongside. Even after passing it on, the origin stays visible.



The info header above every capture

An editor that thinks along

Add annotations, redact areas, combine several captures. Password fields are covered automatically, before the image is even made.



Tools, canvas, info header

Verify it yourself

Every checksum can be checked independently:

```
sha256sum <file>
```

```
certutil -hashfile <file> SHA256
```

The procedure is documented – verifiable without the software.

Ready to pass on

One click, one bundle: originals, edits, capture record and proof files in a fixed structure. As PNG, JPEG, PDF or ZIP – the PDF optionally split onto A4 or Letter.

```
TecInt_Beweispaket_20260908_124717.zip
  aufnahmen/
    001-beispielartikel.png        Original, unverändert
  bearbeitet/
    001-beispielartikel-b1.png     mit Anmerkungen
  protokoll.pdf
    protokoll.md                   Formular zum Unterschreiben
  nachweis.json
                                   alle Angaben maschinenlesbar
  nachweis.txt
                                   dieselben Angaben zum Lesen
```

An evidence bundle as it is created

Every step stays traceable

Change one entry and the chain breaks at exactly that point
